

Options for Small Forest Landowners With Fish Passage Barriers

If you are a small forest landowner who has a bridge or a culvert that is a fish passage barrier and you are planning a timber harvest or salvage, you have the following options:

- 1) You may repair, remove, or replace your fish passage barrier at your own expense prior to the expiration of your Forest Practices Application (FPA) for timber harvest. **OR**
- 2) You may schedule the removal, repair, or replacement of your fish passage barrier at your own expense through a [Road Maintenance and Abandonment Plan](#) (RMAP). **OR**
- 3) You may voluntarily enroll in the [Family Forest Fish Passage Program](#) and may benefit by having your fish passage barrier removed, replaced, or repaired at the time your project is prioritized and funded

For more information contact a DNR Region Office and ask for Forest Practices or visit our website at: www.dnr.wa.gov
